

CACAO

a Multilingual Interface to Library Catalogues

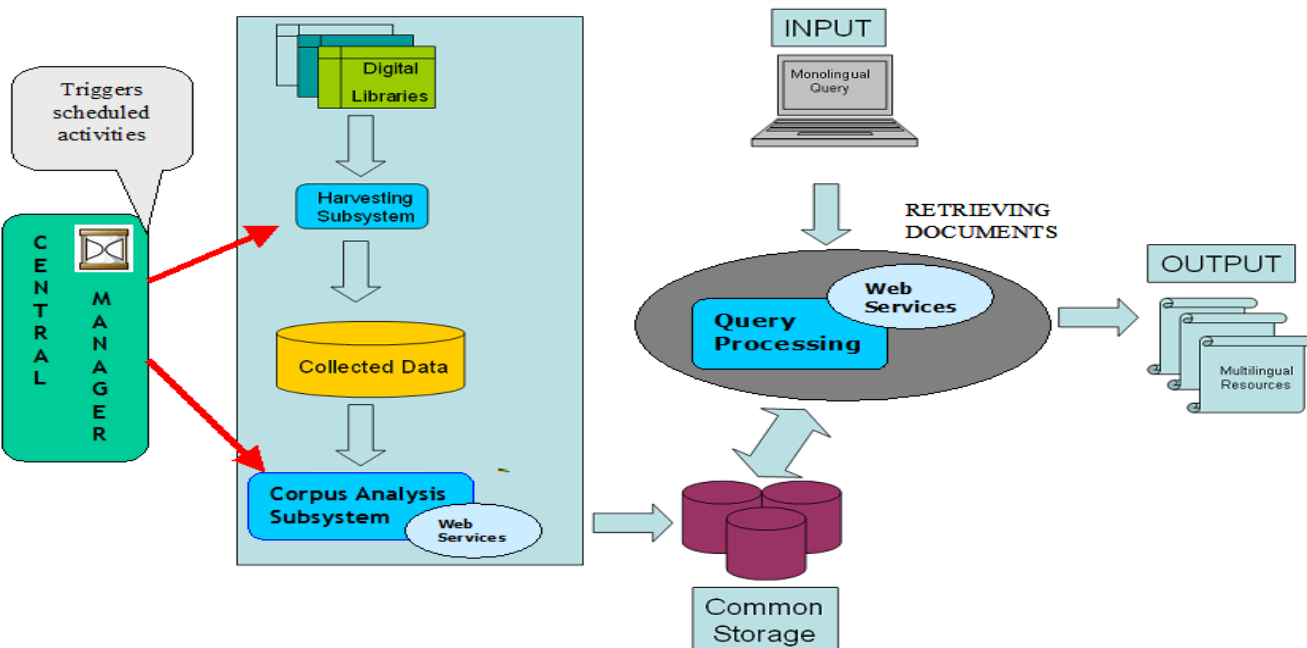

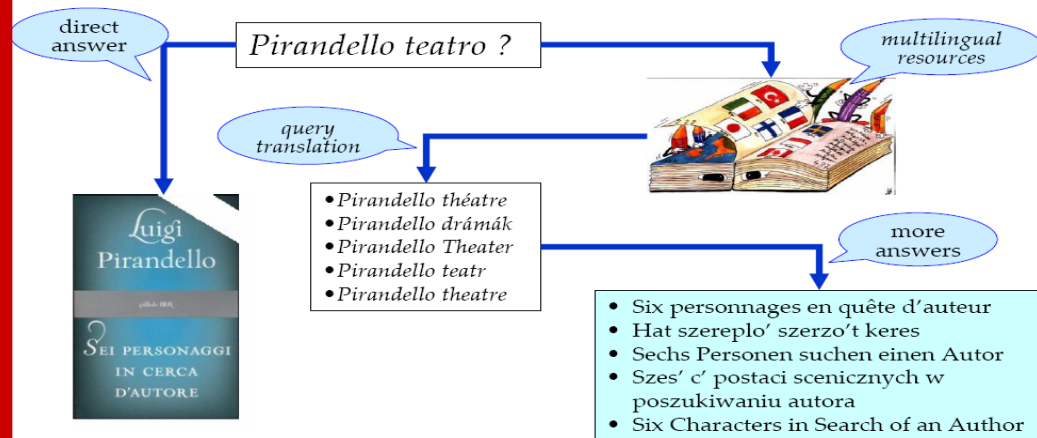

Alessio Bosca (alessio.bosca@celi.it)
Luca Dini (dini@celi.it)

What is CACAO?

CACAO offers an innovative approach for **accessing**, **understanding** and **navigating** multilingual textual content in digital libraries and Online Public Access Catalogues (OPACs).

A query in one language, answers in different languages

Linguistic agnostic approach. Resources for different languages (dictionaries, thesauri,..) included via **Web Services**

CACAO Suite – Administration Interface

Different panels allows librarian to manage the different modules, view logs and perform off-line tasks/updates.
