‘Inventing the Web allows me to spend even more time at home!’

Sir Tim relaxing on his favourite sofa

‘Inventing the Web allows me to spend even more time at home!’

my house for many things …… shopping for food, buying (more) home furnishings, giving lectures at MIT, and now thanks to the Web I can do this all online!’ He gives a very broad grin at this point. ‘That was my main motivation really ……. how can we get rid of all of this “leaving the house nonsense” and allow everyone to spend more time in their home ….. Doing the things they really love … like re-arranging sofas, selecting and putting up curtains …. Sitting down with their dog reading a good book .. drinking tea .. and Fried Food.” Now his face really broadens. “I just love Fried Food …. Unfortunately its not easy to get proper Fish and Chips in the US, so I have to make to with Fried Chicken. Not a bad substitute. Sometimes when I travel.” He gives a heavy sigh at this point. “I eat lots of Fried Food to remind me of home.”

Sir Tim thinking of his next great invention

‘…when I’m missing home …. fried food helps’
