YEAR
Young European Associated Researchers

Jarno Salonen
Technology Transfer Conference, 7.10.2010, Ljubljana
What is YEAR?

- A growing network of young researchers from RTO’s and industrial organisations
- Not-for-profit organisation
- Founded in 2007 in Udine, Italy
- Consists of 10 members with over 13 000 employees

YEAR aims at facilitating the exchange of ideas, best practises and people.
Every European research and technology organisation (RTO) and industrial research body (IRB) that has young professionals as part of the staff is a potential YEAR member.
Young Professionals & Technology Transfer

- Challenges
  - Experience and networks,
  - Scientific and economic performance

- Marie Curie Actions: “Technology transfer and entrepreneurship are part of the initial training activities of young researchers”

- Motivation:
  - Young professionals have strong potential for enhancing technology transfer activities
What does YEAR have to offer?

- Networking - also within your own organisation
- News and information about member activities
  - Newsletters consisting of information about members, member activities, past and forthcoming events, etc.
- Mobility
  - Research exchange through international project activities
What does YEAR have to offer?

- Training courses
  - CREATE- A Marie Curie supported project (2007-2010) consisting of four training courses; provides theoretical insight and practical training regarding how to successfully participate in multicultural projects on a European level.
  - Last course in Trondheim in June 2010, Human resource management in teams

- Conferences and other events
  - Annual Conferences
    - Brussels, Belgium 2008: “Making Money out of Research”
    - Graz, Austria 2009: “The Recipe of Being a Smart Researcher”
    - Sevilla, Spain, 12/2010: “Getting your research funded by private companies” (TBC)
  - Open Innovation workshop 2009
Summary

- YEAR supports young professionals in technology transfer activities through:
  - Information distribution
  - Training courses and other events
  - Possibilities for networking and mobility

- Beneficiaries: Young professionals and their employers; RTO’s and industrial research bodies

- Supporting activities (both internal and external) are required to enhance technology transfer adoption
  - Contribution of senior researchers and other professionals to improve the scientific performance
  - RTO commitment for long-term development
YEAR takes care of your young researchers!
