TIA and start-up companies

Mojca Skalar Komljanc
Slovenian Technology Agency - TIA
TIA supports various companies through various programmes. We have two programmes that are focused on young companies and their innovative environment.

1. **INO** – a tender that offers grants to supportive companies to improve the innovative environment in Slovenia, help to create new innovative companies, advice in different fields of innovative entrepreneurship and most of all organize all kinds of events to help companies create partnerships and promote themselves.
2. **VALOR** – a tender that directly supports young/new companies which are willing to transfer the technology from University to the market. We just supported 6 new companies on different high technological fields and we hope that after 2 years we will hear of some great successes from them.

Both of mentioned tenders will be published again next year. If you need any further information do not hesitate to contact us.
