Kürzliche Aktivität

Capitales y Banderas de Europa. Juegos Geográficos

Geteilt von Equipo GN OSS

Este juego interactivo presenta varias fases, como por ejemplo el calentamiento, el maratón, la carrera, el sprint, cada una con sus propias reglas. El cálculo de las puntuaciones y de la bonificación de tiempo varían en función de la fase....

Here are the different kinds of exercises that you can make with FLAX.

### Word Guessing

Students enter words in the gaps, based on the context within a given article, individually or collaboratively.

This activity helps improve your vocabulary and sentence structure and your communication skills.

**Type:** Individual or Group collaboration

**Instructions:** Click on the gap and type in a word. Click on the light bulb icon (if any) for help.

[Try it](#)

### Scrambled Sentences

The words of sentences are scrambled and students must sort them into their original order.

This activity helps you study sentence structure by providing you with genuine text and allowing you to select suitable materials to practice on.

**Type:** Individual

**Instructions:** Put the bold words in the correct order by drag-drop them into the correct position.

[Try it](#)

### Image Guessing

This activity is for image collections only.

A randomly chosen image is shown to one player (called the "describer"), while the other player (the "guesser") must identify it by asking questions.

This activity helps improve your communication skills and vocabulary.

**Type:** Collaboration in pairs
Winner People’s Choice

Water Viz
