QUIZ!

## Future of Learning

“New technologies, work patterns, and practices are disrupting how we learn, where we learn, and what we need to learn. The definitions of teacher and student are becoming fluid, and education itself is moving out of episodic experiences in traditional institutions and their classrooms, into learning flows that course through our daily lives. People of all ages dip in and out of these flows, engaging in continuous learning channels that are contextually relevant and always available. Opportunities and resources for learners are no longer scarce but abundant; they are pervasive rather than localized. Such a transformation calls on educational institutions, learners, and our society as a whole to challenge the assumptions, structures, and principles that have worked thus far.”

## Future of Learning

“New technologies, work patterns, and practices are disrupting how we learn, where we learn, and what we need to learn. The definitions of teacher and student are becoming fluid, and education itself is moving out of episodic experiences in traditional institutions and their classrooms, into learning flows that course through our daily lives. People of all ages dip in and out of these flows, engaging in continuous learning channels that are contextually relevant and always available. Opportunities and resources for learners are no longer scarce but abundant; they are pervasive rather than localized. Such a transformation calls on educational institutions, learners, and our society as a whole **to challenge the assumptions, structures, and principles that have worked thus far.**”
